

THE BLAIRMORE ENTERPRISE

VOL. XXXVI, NO. 40.

THE BLAIRMORE ENTERPRISE, FRIDAY, OCTOBER 5, 1945.

\$200 PER ANNUM

"Serve the Church that the Church May Serve You."

CENTRAL UNITED CHURCH BLAIRMORE

Rev. James McKeivry, Minister

Services Sunday next:

11.00 a.m., Senior school.
2.00 p.m., Junior school.
7.30 p.m., Public Worship.

ST. LUKE'S CHURCH, BLAIRMORE

Rector: Rev. W. B. Brown

The 19th Sunday after Trinity:

Holy communion 11 a.m.
Sunday school 12 noon.
Altar flowers given by Mr. and Mrs. Barrell and Dora in memory of Lilla Johnston.

There will be a special service for our young people on Sunday, Oct. 21, at 11 a.m., in St. Luke's church.

SALVATION ARMY, COLEMAN

Captain and Mrs. T. Smith, Officers in charge.

Sunday services:

11 a.m., Holiness meeting.
2.30 p.m., Directory class.
3 p.m., Sunday school.
7.30 p.m., Salvation meeting.

Tuesday: 7.30 p.m., Red Shield auxiliary and Home League.

Thursday: 8 p.m., Praise meeting. Funerals, dedications and marriages on application to the local officers.

HILLCREST UNITED CHURCH:

Services every Sunday at 3 p.m.

BELLEVUE UNITED CHURCH:

Services at 7.30 p.m. every Sunday.

COWLEY UNITED CHURCH:

Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

BELLEVUE BAPTIST CHURCH

Pastor Evangelist: Alfred Siple

10.30 a.m., Sunday school.

11.30 a.m., Morning service.

We preach the Victory Life of Christ, and invite you.

FOR SALE — At a sacrifice, fruit

branch of 80 acres; good peach, cherry, apples, prunes, grapes; two cows, two horses, all tools, private water system, plenty of water for irrigation and all other purposes; 100 yards to school. Also store. No better fruit district in British Columbia. Will prove its worth by return receipts from packing plants. Land cleared for an additional one thousand trees. Price \$6,500. Six thousand cash will pay for itself in two years. Cash receipts will be around \$5,000 this year. Prove this to anyone investigating. And this besides a good living in the finest climate in British Columbia — I say "the absolute finest," seldom snow for more than six hours at a time. Apply Box 24, Rossland, B.C.

WIN A TOURISTS' LODGE

\$13,000

TOURISTS' LODGE, a 1942 CHEVROLET SEDAN, 73 other prizes, 75 prizes totalling \$20,000 or the equivalent in Victory Bonds. Mail this "ad" with ONE DOLLAR subscription to "The Kamloops Memorial Recreational Society," 389 Victoria Street, Kamloops, B.C.

Proceeds to be used to erect a Recreational Centre for our returning Veterans and the citizens of this district. Date of drawing to be announced in press. Don't delay! Act now! (75-45)

IF YOU ARE LONELY

write Box 32, Clarkston, Washington.

Send stamp.

Among the 774 Alberta veterans enroute home across Canada from overseas are Lt. R. J. Harner, Blairmore; Pte. D. Bower, Pincher Creek; Pte. A. G. Fisher, Bellevue, and Pte. A. R. Davis and Gnr. H. J. Godslave, Coleman.

WORLD FOOD and the PRAIRIE FARMER

DAIRY AND BEEF PRODUCTION

(NOTE—This is the fourth of a series by Dean R. D. Sinclair, well known authority, written especially for the weekly press of the prairie provinces.)

Any plan designed to feed people properly and thus contribute to the peace of the world will give a prominent place to the dairy cow and the dairy industry. Milk, butter, cheese and other dairy products have been more highly appreciated than ever during the recent war years, and nutrition authorities stress the importance of maintaining the dairy industry at a high level during the years that lie ahead.

The prairie provinces have not been regarded as a great dairy producing area, but the fact remains that marked increases have taken place in the output in all dairy products during the past thirty years. The performance during the period of the present war indicates the possibilities of dairying in a territory mainly thought of as contributing to world grain supplies. We have nothing to fear in the matter of quality of our creamery butter. In competition with butter from other parts of Canada, western butter grades high.

Large areas of the west are well suited to mixed farming. Good farm practice in these sections suggests the growing of forage and greenfeed crops and coarse grains and our history has shown that the marketing of these through the dairy cow has provided a dependable revenue. Creameries and, to some extent, cheese factories have been established at strategic locations and around these have grown stable and enterprising communities.

The natural increase in our population will lead to a steady upward trend in whole milk consumption. Butter produced in western creameries should meet with a steady demand. A start has been made in the dehydration of milk and we could, if called upon, make a reasonable contribution to world supplies of concentrated dairy products. It would seem reasonable that we may look forward to a steady growth in prairie dairying.

Beef has been a staple product of our western agriculture. Certain sections of the prairie provinces have been earmarked by nature as cattle-grazing grounds. The turning over with the plow of certain of these lands has been proved a mistake and much of the damage that was done has been repaired through the reseedling of blow-out and abandoned areas. Cattle ranching will remain a permanent part of our beef-producing scheme.

The conditions which were mentioned earlier as favoring dairying, particularly of the "creamery" type, also lend support to the development of beef production. The mixed farming areas provide a volume of pasture and roughage which can be combined with coarse grains in the growing and finishing of beef. Cattle raised in these parts of the country may be finished on the home farms and in addition feeding areas which utilize farm-grown feeds to finish cattle produced on the range lands have been developed. Experience has shown that cattle finishing, when carried on as a regular enterprise, has created a profitable market for pasture and roughage and has been a means of marketing grains at higher prices than would be obtained on the cash grain market.

Western Canadian range cattle have established a reputation for quality. Cattle from the farming areas, particularly from those farms where they are raised in small numbers, have not reached the same standard. Too high a percentage fall into the lower

COWLEY HAPPENINGS

Mr. and Mrs. Michael Elton spent a few days in Calgary this week.

Mr. and Mrs. Harry Gray, of Calgary, are visiting at the home of Mr. and Mrs. Harry Smyth here. Mr. Gray recently returned from overseas, where he served with the RCAF. He is a brother of Mrs. Smyth.

The regular baby clinic of the Pincher Creek School Division was held in the Community hall at Lundbreck on September 27th, when several small children were inoculated for diphtheria and whooping cough.

Major and Mrs. Jack Little, of Edmonton, were renewing acquaintances here on Monday. Major Little, who served four years overseas, is on a 30-day leave, pending discharge.

Pta. Erwin Feller recently received his discharge at Calgary and is now home with his parents here, Mr. and Mrs. L. A. Feller.

Harvesting, which had been held up for about two weeks on account of bad weather, was again in full swing on Monday of this week.

IC Stoker Yuan Fournier, of the RCN, who is now stationed at Halifax, is on a 30-day leave pending discharge. In company with his wife, he spent a few days visiting his brother-in-law and sister, Mr. and Mrs. Peter Iwasaki.

Mrs. H. Potentia, of Victoria, arrived on Tuesday for a two weeks visit with her parents, Mr. and Mrs. M. A. Percevalet.

Mr. and Mrs. Lawrence Dionne and small daughter Clara, of Coleman, are spending a few days at the parental home of Mr. and Mrs. T. La-pointe at their ranch in the Porcupine Hills.

Mr. and Mrs. Cecil Blackburn and baby daughter Sandra, of Twin Butte, spent Sunday here, the guests of Mr. and Mrs. M. A. Murphy.

A meeting of the local Red Cross was held on Saturday afternoon, when arrangements were made to gather clothing for the destitute overseas and to carry on the work of the Red Cross for at least six more months, and on motion decided to hold the monthly baby clinic here. Mrs. Wilbert Fortier and Mrs. T. E. Murphy served refreshments. The next meeting will be held at the home of Mrs. Fortier.

Word has been received by letter saying that Miss Alire Ritz was married at Stratford, New Zealand, to Squadron Leader Jack Murphy, of that place. The honeymoon was spent in Wanganui, New Zealand. Miss Ritz was born and raised here. She served two and a half years in the WD of the RCAF, and met her life partner when serving in that capacity at Vancouver. In company with twenty young women who were going to New Zealand to join husbands and sweethearts, Miss Ritz set sail for that far off land about four months ago, taking six weeks to make the journey.

grades. There is need for improvement in type and in finish. Improvement in type can only be brought about through the consistent use of good sires and better finish by means of marketing more grain in the form of good beef. Good breeding, proper feeding and the use of convenient equipment are factors which we must stress in the development of our beef and dairy enterprises. In many cases in the past a shortage of money has made it difficult to buy good sires or install labor-saving equipment. It was often necessary to "cash in" on grain rather than hold it for feeding. Investments which dairy and beef producers have made in the form of Victory Bonds should provide an opportunity to purchase better sires and bring about other improvements in their production programme during the next few years. Now is the time to consolidate our position and press forward with the job of placing on the market beef and dairy products of the best quality.

HILLCREST HAPPENINGS

Miss Beanie Thomas, of Pincher Creek, was a visitor here on Monday, the guest of Mr. and Mrs. W. Moser. In the game played here on Sunday the Hillcrest baseball team lost the championship for the Crows' Nest Pass to Blairmore, the score being 11 to 10.

The grade seven and eight pupils, under Mr. W. Webster, have organized a campaign to collect clothes for the National Clothing Drive.

The post-office building has been treated to a new coat of paint, being the seventh building on main street to have been painted lately, and it definitely improves the appearance of the town.

Marjorie Estelle Graham, daughter of the late John Graham and Mrs. Graham, of Kincairdine, died in the Kingston General hospital on Wednesday, August 22nd. She took ill in June while visiting her sister, Mrs. Brampton. Marjorie received most of her education in Alberta, where she taught school for several years after graduating from the Calgary Normal school. The last six years she has lived with the family in Ontario. For many years Miss Graham was on the Bellevue teaching staff. She had a host of friends in the Pass.

WELL KNOWN CITIZEN PASSES

Victim of a heart attack, Mr. F. C. Germaine, well known member of the lumbering firm of C. Drai's company, passed away suddenly at his home in West Blairmore on Wednesday evening.

He is survived by his wife, one son and one daughter, Mrs. A. Olsen. The son is yet overseas.

Funeral will be held on Sunday, with Veterans and Elks attending, service to be held at the United church conducted by Rev. J. McKeivry at 3.30 p.m. The remains will be laid to rest in the Union cemetery.

SUGAR-BEET HARVEST

STARTS THIS MONTH

Sugar-beet harvest and factory operation begin this month in all four sugar-producing provinces of the Dominion. Latest estimates of domestic beet-sugar production promise 87,250 short tons of refined sugar from a total of 59,800 tons. Last year's production was 85,000 tons.

Processing commenced the first of October in Alberta and later in the central and eastern provinces. Quebec will not start until October 25th.

Alberta expects 355,000 tons of beets from 30,300 acres. This crop will yield about 100,000,000 pounds of sugar in 118 days' operation of the two factories. Manitoba started on October 2nd to process 57,000 tons of beets from a crop of 10,000 acres. This should run their factory for 60 days and produce 23,000,000 pounds of sugar.

Ontario's run will start about October 15th and will process 155,000 tons of beets from 17,500 acres, yielding an estimated 47,000,000 pounds of sugar in 60 days' operation. One of the two large factories will be idle. Quebec expects to harvest 18,000 tons of beets from 2,000 acres. They judge this crop will produce 4,500,000 pounds of sugar in a short run of 2 days.

NO CLOTHING AVAILABLE

A New York correspondent in Holland reports that black market operations in clothing have virtually ceased in Holland. The reason given is that little, if any, clothing can be bought at any price. If it were available, clothing could be used as a form of negotiable currency. You can help to relieve such onerous conditions by giving all you can to the National Clothing Collection, via the local committee, between now and October 20.

SUGGEST MAKE OVER UNIFORM

GWAC uniforms, excellent as to materials and fit, can be dyed and made over for fashionable civilian wear. Mrs. F. C. Butterworth, Edmonton prices board, consumer branch committee, suggested recently to a group of GWAC's at Prince of Wales Armouries, Edmonton.

Explaining to the army girls, sheltered from any repercussions of civilian shortages during the past months and years, that textiles are short the world over, with imports cut and needs in Europe to be met, Mrs. Butterworth advised: "buy no more than you can get by with."

Citing rising prices culminating in inflation after the last war, Mrs. Butterworth urged the girls to watch prices when they resume civilian buying.

CANADA'S FUTURE

GOVERNS PRESENT

Canada's future is bound up in feeding Europe now, according to Miss Hilda Beal, of York, England, currently engaged in a lecture tour through Canada after completing a tour through the United States. Miss Beal is speaking to various clubs in Alberta during the week.

It behooves us all to put Europe back on its feet. First of all, Europe must be fed, Miss Beal said, pointing out that war ravaged countries are in dire need of food, and some, like Yugoslavia, are completely without any type of meat.

Canada, or any other nation, cannot afford to have Europe in revolution. To have prosperity for all, there must be brisk international trade. We must stimulate trade and see a happy people on its feet again, Miss Beal told Alberta audiences.

FEDERAL WARTIME

SPEED RATE DROPPED

After being in effect for more than three years, the speed limit of 40 miles per hour on highways has been removed by the Dominion government.

Official word that the order has been lifted has been received by the Alberta Motor Association. It did not come as something entirely unexpected as it has been anticipated for some time since the end of the war that these restrictions on motorists would be removed without delay.

While the 40-miles-per-hour speed limit is gone, motorists are urged by the federal authorities to drive at moderate speeds to conserve tires and automobile equipment. This advice should be carefully observed as it will be in the interests of car drivers under existing conditions, according to officials of the AMA.

Many cars still are being driven on old tires. If excessive speed is attained, there is the added risk of accidents, probably with fatal and at least serious results in many cases.

With the speed limit fixed by federal wartime orders now removed, Alberta drivers will be governed by the provincial act which says cars must be operated at a reasonable speed, having regard to the circumstances and conditions on the highway.

MINERS DEMAND MORE MEAT

A mass meeting of miners of the district between Fernie and Bellevue was held here on Tuesday afternoon, at which the mine strikers pled in connection with the meat ration was thoroughly discussed.

The miners are incensed at the attitude of Donald Gordon, that the miners are completely irresponsible, and with the attitude at Ottawa in ignoring the requests of the mine workers. They do not like dictatorship or Mr. Gordon setting himself up as a czar after they have fought a war for freedom.

Mayor Williams stated: "Our miners say they can't dig coal on the present ration of meat and say further they won't."

TRULY A WAR LOAN

Nowadays we are being justified by problems of peace. Almost everything we read, all the utterances of public men, tends to emphasize the fact that the war is now history.

Yet, the Ninth Victory Loan which will be opened to the public on October 22nd, is definitely a war loan.

There exists no magic wand one can use to craft military forces from the scenes of battle to their usual home surroundings overnight. Unfortunately, long after the enemy cries surrender, the cost of war goes on. It is estimated, for example, that the country of Canada must raise a sum of about \$25,000,000 during the present year to provide adequate medical attention and hospitalization for the men who are coming back wounded and sick. Last year, members of the House of Commons were told that at that time \$750,000,000 would be needed to pay gratuities and take care of re-establishment credits to men returning from battle. One year having passed since then, the cost of that important undertaking has now reached \$900,000,000. In addition to all that, the Canadian people must meet the cost of bringing the troops home, the maintenance of our forces of occupation in Germany. Pay of men who are waiting demobilization goes on. Cheques to dependents keep going out until the soldier has his discharge paper.

There are heavy domestic expenditures, made heavier by the unprecedented demands of this period of reconstruction in the country, which are included in the total Ninth Victory Loan objective. But of this we can be sure. The major portion of the money which Canadians will provide by the purchase of bonds in October and November is needed to cover the cost of war.

SUPPORTING NATIONAL CLOTHING COLLECTION

The Prime Minister's statement follows: In many Allied countries today, millions of men, women and children still suffer extreme privation. They have not enough clothing to keep them warm. Lacking clothing, the sick cannot get well nor the weak become strong. With millions ill-clad and nearly shoeless, these Allied peoples are desperately handicapped in facing the tremendous tasks of reconstruction following invasion. As a measure of help, a National Clothing Collection is being held throughout Canada from October 1st to October 20th, to obtain spare used clothing for free distribution to these destitute peoples. The clothing collection is sponsored by the Canadian United Allied Relief Fund on behalf of the United Nations Relief and Rehabilitation Administration. It has received the approval of the Canadian government.

The people of Canada made magnificent contributions in all directions to help our Allies during the war. I am confident that they will be no less great-hearted in responding to the urgent appeal for clothing now being made.—W. L. Mackenzie King.

BRITISH MERCHANT SHIPS FOR FRANCE

Britain is to replace all shipping losses suffered by those United Nations who placed their merchant ships at the disposal of the allied cause during the war. Seven British merchant ships, for instance, have recently been sold to France, and a further three are to follow. Besides this, the British government has granted widespread facilities for the building of French merchant ships in British shipyards. Similar concessions are being granted by the British government to other United Nations.

WORLD HAPPENINGS
BRIEFLY TOLD

Sir Harry Lauder, celebrated Scottish singer, marked his 75th birthday by singing his favorite songs for scores of guests who visited him.

German submarines which have been touring British ports have so far netted £5,000 (about \$25,240) for charities.

Ten-passenger helicopter planes will be used extensively throughout Scandinavia on feeder lines to Britain-Scandinavia Air Service, it was learned.

Congratulations were sent by the Air Ministry to the staff of Chelmsford gasworks which produced hydrogen for the entire London balloon barrage.

The German Embassy furniture, including the safe in the Ambassador kept his private papers, was sold at public auction in Dublin on behalf of the United Nations.

A Lockheed Constellation transport plane set an east-west transcontinental flight record in eight hours and 39 minutes between Washington, D.C., and Burbank, Calif.

British shipyards have started to convert 10,000,000 tons of shipping from war to peaceful commercial standards and the job is expected to keep most shipyards busy until 1950.

Dome agency broadcast from Japan said that Japanese purchasing goods from American soldiers or exchanging goods with them would be liable to death or 20 years imprisonment.

To help civilians paralyzed by an injury or wound to the spinal cord, war veterans have formed an association to be known as the Canadian Paraplegic Association. One of its aims would be to develop and encourage vocational and professional training of paraplegics.

Opinion Of Scientist

Believes Atomic Bomb Should Not Have Been Dropped On Cities
Prof. M. E. Oliphant, one of the pioneers in development of the atomic bomb, asserted that scientists who developed the weapon would not have used it as militarists and politicians did.

He predicted atomic energy would be used industrially within 10 years and that the nuclear energy eventually would replace all other forms.

He told a service club (Hofory) in Birmingham, England, he thought scientists were more horrified than anyone else when the bombs wrecked two Japanese cities.

"Scientists believed this weapon could have been used against Japan very effectively without dropping it on a city," said Prof. Oliphant, professor of physics at the University of Birmingham. "Intensive propaganda by wireless and head would have warned the Japanese that one of these weapons would be dropped."

He said if this failed, the next step should have been to drop the bomb on the islands in Tokyo bay which were naval bases. He said a city should have been destroyed only as a last resort.

He said there was no defence against the bomb and described the idea that Great Britain and the United States, or any other country, could control the bomb by keeping the process secret as "just rot."

The atomic bomb had the equivalent explosive force of 20,000 tons of TNT. He was confident that before long bombs could be made with an explosive force of 1,000,000 tons of TNT, and subsequently of 10,000,000 tons of TNT.

Any industrial country could have the bomb in five years and any developed industrial country could have it in two. Control of the bomb could only be brought about by some sort of mutual agreement.

Using Peach Fuzz

United States Firm Requires Large Quantity For New Product

You have heard about packing houses utilizing every bit of the pig but the squeal.

Now it seems that every bit of the peach, including the fuzz, is to be put to use.

L. A. Boyd, New Troy horticulturist and officer of the Michigan Fruit Sponsors, Inc., has received a letter from a firm of industrial research chemists, saying it is developing a product that requires large quantities of peach fuzz.

The chemist asked where large quantities of the fuzz could be purchased.

If cannot estimate the fuzz available, but you would be surprised at the amount," Boyd says. "Seven or eight exchanges in this fruit belt operate peach defuzzing machines and end the day with a large supply."

SHOCKING FIGURES

The Ottawa Journal says it is shocking to read that in Canada last year 311 children died of diphtheria, that cases and fatalities showed a marked increase over the two preceding years. It is shocking because immunization against diphtheria is harmless, efficient, and everywhere available. It is shocking because as rare as smallpox, if we used against it the knowledge and means we possess.

THESE NEVER DID MAKE THE GRADE—Memo to Canadian servicemen in the Pacific. Relax, fellows. Those jungle coifurers never did make the grade. According to Canadian hairdressers, girl friends and wives aren't keen about those Burmese humps and spiral shikholes you disliked. "Hollywood is still the big influence," one expert stated. "Soft, romantic waves—the glamour stuff—that's our stock in trade." "Canadian girls are just a little conservative," another beautician said. "We haven't had one customer ask for native imitations." Casual hair-do's, going under titles such as "neat slants," "romantic height" or "top lock curls," are most popular with the young set. Curls are strictly passe.

Caused By Weather

Watch Repairers Say Thunderstorm Will Cause Main-Spring To Break

If the main-spring in your watch is broken, the odds are two to one that a stray thunderstorm is to blame.

Leading jewellers in Columbus, Ohio, and watch repairers have aired their theory that main-springs break most frequently after a thunder-shower.

Sidney C. Howard, a watch repairer for 38 years, says that the rapid change in climate and atmosphere after a thunderstorm causes the main-spring to contract and break. The same thing sometimes happens to a pocket watch which is removed from a warm pocket and left to stand unwinded in a cold room during a winter night.

Robert Smith, public relations director for the Battelle Memorial Institute at Columbus, says that although the institute has not conducted any experiments along this line, metallurgists agree that a change in temperature affects metals. He adds that he found that upon placing a wrist watch on a cold window sill after it had been next to body temperature all day the watch usually stopped running but that the main-spring ordinarily did not break.

Clocks, however, escape the curious quirk of nature, jewellers say, because clocks have heavier main-springs than watches and are not affected by thunderstorms.

Another Columbus jeweller and watch repairer, Rucy Rhodes, explains that sometimes delayed reaction to the weather postpones breakage of a main-spring from one to ten days after a thunderstorm. He stated: "The widespread belief among laymen that main-springs usually are broken by being wound too tightly. He points out that most watches have safety devices which prevent excessive winding."

Will Retain Food

Britain Will Stop Sending Food To European Countries

Britain will stop sending food to hungry European countries after current shipments have been halted, reports the wide-spread belief among laymen that main-springs usually are broken by being wound too tightly. He points out that most watches have safety devices which prevent excessive winding."

It is said that 500 different kinds of materials are used for manufacture of shoes.

He reported that Britain has on hand or en route only sufficient food to supply her own people. Britain had reduced her stocks to a minimum to keep the promise she made last March to send supplies to liberated countries.

"We can only do it once," he said. He disclosed that Britain will receive her first shipment of bananas in five years early in 1946 from Jamaica. The first oranges to arrive here since V.J. Day are due from South Africa, he said.

Smith reported that Britain receives one third of her meat from Argentina.

Dream House

New Home In Toronto Requires No Ducting And Has No Furnace

A one story "dream" home which requires no ducting and has no furnace is nearing completion on Dale avenue in Toronto's swank Rosedale district.

Built by Mr. and Mrs. C. F. Woods who tried of renting houses after 20 years of married life, the L-shaped house combines "radiant" heating with air conditioning and solar heating to keep rooms at desired temperatures. Principal heat is provided by iron pipes embedded in concrete floors.

To obviate ducting, the owners installed an electrical gasket known as the precipitation, which electrically charges dust and smoke from cigarettes while another part of the device attracts the charged particles.

A forest area, burned over once only, grows again, but a double burning destroys all the seeds and makes regenerating necessary.

India is two-thirds the size of the United States.

SUNDAY SCHOOL LESSON

OCTOBER 7

THE CHRISTIAN WAY OF LIFE

Memory Selection: Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself. Luke 10:27.

Lesson: Matthew 22, 36-39; Mark 12, 29-34; Luke 10:27-37.

Devotional Reading: Colossians 3, 12-17.

The Text Explained With Comments
The Christian Way of Life is the Way of Love. A certain lawyer stood up and made trial of Jesus, sought to elicit from him an answer that could be used against him. He was not a lawyer in our sense of the term. The Abingdon Commentary thinks that Luke speaks of lawyers instead of scribes, the term used in the other Gospels, because Theophilus, whom he was writing, would be familiar to understand scribes to mean clerks. The scribe's question, What shall I do to inherit eternal life, meant to him, What facts, prayers, sacrifices are essential, for he believed that eternal life would be his reward for spiritual acts. The phrase "eternal life" was in use among the Jews before Christian times, and would be familiar to a scribe, but the New Testament enriches the content of the idea. In the Synoptic Gospels it is regarded as a future possession to be had after death; thus here the lawyer speaks of inheriting it. In John it is already a present experience of the people of God; and both in the Fourth Gospel and in John's Epistles it is presented to us as a spiritual condition, the divine life in the soul" (Walter F. Adeney).

In his turn Jesus asked the scribe, "What is written in the law? How readest thou?" Then the scribe quoted in reply Deut. 6.5 and Leviticus 17:18. In the incident recorded in Mark 12:29-34 and Matt. 22:36-34 (which is also assigned for our lesson today), it is Jesus himself who unites these two statements from distinct parts of the Old Testament. One cannot help surprise at finding that Luke credits a mere scribe with such acumen.

Jesus commended the scribe's answer and said, "This do and thou shalt live." The scribe, wishing to show that he had asked a question so simple that it could be thus quickly disposed of, quickly said, "And who is my neighbor?" In Romans 13:8 we read, "He that loveth his neighbor has fulfilled the law," where the Greek words translated "neighbor" are "ton stemon, the other." The "other" is a good definition for "neighbor." To teach the scribe this the Lord Jesus told him the parable which we call The Parable of the Good Samaritan.

He told the scribe, "This do and thou shalt live." The scribe, wishing to show that he had asked a question so simple that it could be thus quickly disposed of, quickly said, "And who is my neighbor?" In Romans 13:8 we read, "He that loveth his neighbor has fulfilled the law," where the Greek words translated "neighbor" are "ton stemon, the other." The "other" is a good definition for "neighbor." To teach the scribe this the Lord Jesus told him the parable which we call The Parable of the Good Samaritan.

Charred Stone

Great Arch Of House Of Commons In London To Be Rebuilt

Every charred stone of the great arch that leads into the old blitzed House of Commons Chamber is being taken down and numbered carefully, to be re-erected and incorporated in the new Chamber. Scarred and scorched as it is, the arch will be a memorial of the night of May 10, 1941, when the House of Commons burned, and in some measure to the courage of all the members of the House who stayed and carried on the Government of Britain in defiance of German bombings.

Canadian Was First

Raised Union Jack In Singapore Three Days Before Occupation

The first man to raise the Union Jack in Singapore after the end of the war in the Pacific, was Lt.-Col. A. R. Stewart of Vancouver.

Col. Stewart, a paratrooper who had been operating in China, Burma and Malaya in the last 1½ years, parachuted into Singapore three days before its occupation by British forces. He commandeered a car from a Japanese general and to the cheers of Chinese spectators, he rigged the Union Jack on a flagpole.

In the early 17th century it often took two years to make the round trip from Europe to China.

The Hindus plant sweet basil outside their temples and homes to insure happiness.

VALUE OF IMMUNIZING AGENTS
Deaths in Canada in 1944 from diphtheria, whooping cough and scarlet fever totalled 768, it is revealed in figures supplied by the Dominion Bureau of Statistics.

This was lower than the 1943 death toll of 803, but still far too high for this day and age when there are available effective immunizing agents against these diseases.

Immunization against diphtheria can be obtained through use of harmless but effective toxoid. Whooping cough vaccine provides protection in more than 80% of those treated and, in cases where the disease occurs after vaccine has been given, the cases are much milder. Scarlet fever's immunizing agent is a toxin. It has not been perfected as has diphtheria toxoid, but it gives 80% protection.

Immunization through vaccination has practically wiped out smallpox in Canada so there appears to be no reason why the same result cannot be accomplished with diphtheria, whooping cough and scarlet fever.

But, while smallpox is practically extinct, there is still need of vaccination to make sure it remains in that state. There is no natural immunity against smallpox. Vaccination is the only protection.

To draw attention to the fact that every Canadian child should be and can be protected against diphtheria, whooping cough, scarlet fever, and smallpox, The Health League of Canada, in co-operation with health departments, has inaugurated National Immunization Week.

It will be the third such annual observance promoted by the Health League in an effort to give added emphasis to the year-round immunization programs of the League and the health departments.

Free Lessons
Canadian Troops Are Learning To Speak Conversational German

Canadian army troops stationed in Oldenburg, Germany, are now receiving free lessons in conversational German, from a teacher experienced in teaching English to Germans.

Under arrangements with the Canadian Y.M.C.A. in Oldenburg, classes are conducted two evenings weekly with Horst Magel, former inmate of a Nazi concentration camp teaching, Magel and his wife are the sole surviving members of his family, all other relatives having disappeared during the German occupation of Poland.

OUR COMPLETE SHORT STORY— GIRL FROM RANGOON

By ROSS BARNEY

McClure Newspaper Syndicate

Pete was stewed—ingloriously and ignominiously stewed. His expression was that of a dead halibut, and his careful progress resembled the stiff, ungainly gait of a mechanical man. He simply followed the direction of his toes—which led him unerringly to Babe.

Babe was, in every respect, the biggest thing in Pete's life. She stood fully eight feet to the shoulder and tipped the scales at upward of five tons—indications of very comely measurements, indeed, in a lady pachyderm. And the devotion of these two friends was a beautiful thing.

As Pete—squat, swart and unlovely—made his laborious way through the circus camp, one instinct alone remained: Walk—till you've worked this off... or you'll wake up to find that you aren't even an elephant's nuremaid any longer!

But Pete craved companionship. He would annex Babe and compel her to stroll with him in the still of the night.

No doubt it was disconcerting to Babe to be rudely awakened at a time when all good elephants are a-snooze. Possibly she had been dreaming of her childhood days in India, where she'd roamed the jungle, a minor member of a noble harem, ruled over and guarded by a mighty sire. But she blinked her little eyes and followed Pete unquestioningly, somewhat annoyed, perhaps, by the odor of his cheap cigar.

She must have guessed that something was wrong. There was no bustling activity such as attends the breaking up of a circus camp, no blaze of band to herald a parade, in which Babe would pursue her lumbering pace, holding copy to the tail of the elephant ahead. Did her keen intelligence hint to her that this per-

son leading her away into the night was Pete, and yet, in a mysterious sense, not Pete at all? How was the gentle, philosophical Babe to guess that the particular brand of brewer Pete had selected had drugged in him the Jekyll and brought into being the villainous Mr. Hyde?

As they moved ponderously into the night Babe undulated her prehensile trunk and rested it carelessly upon Pete's shoulder, touching his cheek lightly with the delicate, finger-like tabs at the end. As the fumes of his breath reached her—offensive and unfamiliar, Babe halted in her tracks.

Pete, in no mood to brook opposition from so inferior a creature as an elephant, turned and shoved her with thick-tongued abuse, tugging viciously at the big ear just within his reach. Still Babe refused to budge. And her continued resistance drove Pete, in his truculent frame of mind, into a frenzy.

Ordinarily he would have better judgment than to try to win the dignity of a full-grown elephant, however gentle. But Pete was filled with the stuff that inspires the timid mouse to best upon a break and cry: "Bring on your cat!" Doubling up his horny fist he deliberately hung one on the only vulnerable spot in the lowered head—the space between the eyes.

Babe backed away, whistling with surprise and displeasure. A normal man would have realized that Pete's next move was practically the equivalent of writing his own epitaph. But Pete was now fully under the spell of the Hyde complex. Removing the cigar from his mouth he pressed the glowing end against Babe's sensitive trunk.

With a squeal of pain and rage, Babe's gentleness left her. She trumpeted a protest. It was Pete's good fortune, then, that Babe was not a member of the herd. African species, with the huge fanlike ears and cruel ivory bayonets. Babe was a girl from Rangoon, and her tanks, such as they were had been removed.

Babe had never been a mother, but somewhere in the massive brain there lurked, apparently, a memory of the sort of punishment visited by mother elephants upon their rebellious offspring. Colling her mobile trunk, she released it like a spring, delivering what probably seemed to her little more than a love tap, but which sent Pete sprawling and gasping in the sand. And Babe's slow ire still grew.

With his last remaining ounce of strength Pete rolled over on his back and lay in the cleft of the upproaching dunes staring up into the angry little eyes—breathing, no doubt, his own particular version of "How I Lay Me!" This punishment was not complete. Grappling with those fingerlike tabs the burning cigar from where it had fallen, Babe pressed the fiery tip against the cheek of the unhappy Pete.

Screaming and writhing, but now sober, Pete felt himself being lifted from the spot of that terrible truth. At the memory of a similar occurrence he had once witnessed, Pete passed out cold.

Babe seemed to realize at once that the hateful stranger who had treated her so inhumanly had now left her friend's body. With this knowledge her rage vanished. True enough, Pete seemed, to have gone temporarily "musty," but that was over now. Moreover, he appeared to be ailing, and was possibly in pain.

Elephants are known to be very sympathetic. Babe had had her own miseries from time to time—and she knew what to do. Swinging Pete's limp body aloft in the coil of her trunk—she tenderly bore her poor, sick keeper straight to the circus vet.

Important Discovery

Plastic Being Used In Peacetime Production Under New Name

One of the United Kingdom's war discoveries was Plexiglas—an unbreakable, flexible, transparent, glasslike material used in the manufacture of bomber windcreens. This same material will now be applied to peacetime production under the name of "Perapex." Already manifold household goods are being produced from this material, including complete bathroom, electrical and kitchen equipment, picture frames and even furniture. Instead of corrugated iron, Perapex glass may now be used for roofs. Jewellery, tops and wireless casings are also being made out of this attractive material.

FAST DEDUCTION

A Navy siren in the Pacific got a chunk of AA flak in his neck, and after he'd recovered in the hospital, his friend asked how he'd felt when he got hit.

"Didn't feel anything at first," he said. Then how, they asked, did he know he was hit at all?

"Well, I looked to my right and saw a fresh hole in the fuselage. Then I looked to my left, and there wasn't any exit hole. So I had a pretty fair idea where that flak had stopped."

FIRST CASUALTY

The first reported injury of an American soldier since occupation of southern Korea was recorded when it was disclosed a sentry suffered the loss of four fingers when he opened a booby-trapped fountain pen in the governor-general's palace at Seoul.

RELIEVES MISERIES OF Back Cold On the Shoulders

Penetrates deep into bronchial tubes with its soothing medicinal vapors.

Stimulates the chest and back surface like a good, warming massage.

Warning, soothing relief—great relief—comes when you rub good old Vicks VapoRub on the throat, chest and back at bedtime. Its penetrating stimulating action keeps on working for hours. Invites restful sleep. And often by morning most misery of the cold is gone. No need for medicine. Use VapoRub. Try it tonight. Home-proved VICKS VAPORUB.

SMILE AWHILE

"The genuine ivory carvings you sold me last week turned out to be imitation."

"I can't understand it—unless the elephant had a false tooth."

Husband: "What extravagance! You have two hats to match that one dress."

Wife: "Oh, no, I haven't. I've only one dress to match the two hats."

Tommy: "My teacher's got the worst memory in the world."

Father: "So he forgets everything, does he?"

Tommy: "No, he remembers everything!"

"Lost your job as a caddy?" asked one boy.

"Yes," replied the other. **"I could do the work all right, but I couldn't learn not to laugh."**

"You want to wed my daughter?" My answer depends on your financial condition.

"What a coincidence! My financial condition depends upon your answer!"

"He thinks he's Henry VIII, doctor. Is that serious?"

"Not unless he thinks you're Ann Boleyn."

First Wife: "Is your husband a book worm?"

Second: "No, just an ordinary one."

Teacher: "Let was warned to take his wife and daughter and flee out of the city. Lot and his wife and daughter got safely away."

Student: "What happened to the sea, man?"

Teacher: "Now, Tommy, tell me where elephants are found?"

Tommy: "Elephants are much very large animals they hardly ever get lost."

First Workman: "Where is Bill today?"

Second Workman: "In 'ospital."

First Workman: "Wot 'appened?"

Second Workman: "E came down a ladder ten minutes after it was taken away."

He: "So that big substitute ballplayer down there on the bench? I am sure he'll turn out to be our best man."

She: "Why, you darling! Isn't this rather sudden?"

A FREAK ACCIDENT

A man in St. Helen's Lancashire, getting out of his car to investigate a suspected fault, was hit and knocked down by the rear wheel which had fallen off and spun along behind.

"THE LONG, HARD WAY BACK"

—Sketch in the St. Louis Star-Times.

Quality Guaranteed

PAINT TEA

Here and there items: In Dundalk, Ont., a New Toronto woman at a family reunion got first prize for best throw with the rolling pin, her husband outdistanced all others in the 100 yard dash.

What about our woman in the post-war world? The Midland, Ont. Free Press took a survey and found that majority do not want to be career women. Single women when they get married want to keep house, and give up their jobs; married during the war, some wanted to keep working while for a stake. A few believed if there were no children in the home, it was better to keep on working. The consensus of opinion among engaged girls was that they would quit work at once when married. One cynical girl intended to keep on working and make "lots of money," as marriage didn't appeal to her. Many realized their positions in the working world was precarious, with veterans returning, but intend to keep at it as long as they can.

Waiting for an income tax refund is like waiting for death. You know it will come, but you get awfully grey waiting—Picton, N.S., Advocate.

Giant Warships

New United States Warships Too Big For Panama Canal

The United States Navy's new 45,000-ton aircraft carriers, biggest warships afloat, are too hefty to pass through the Panama Canal. In order to reach the Pacific they must round Cape Horn or sail east.

Confirming this fact, naval sources said it is not a case of a man building a boat in his basement too big to take through the door. It is simply recognition that the canal, as a controlling factor in naval construction, is outmoded.

The three behemoths are the Midway, already commissioned; the Franklin D. Roosevelt, launched but not commissioned; and the Coral Sea still under construction.

Supplemental coils, begun before the war, but not completed, will eventually permit the carriers to get through the canal.

Counter Weapons

Produce Projectiles Capable Of Destroying Flame Or Rockets

The London Daily Express said that British and United States scientists have developed counter-weapons to the atomic bomb which are in advanced stages of development.

Chapman Pincher, the paper's science writer, reported that the principles of British radar, German rockets and American fuses were being combined to produce projectiles capable of destroying planes or rockets carrying atom bombs while they are at great height. He said the new defence weapon also would destroy the mechanism of the atomic rockets or bombs before they exploded in mid-air.

SELECTED RECIPES

PEARS ARE PLEASING

At this season one need look no further than the nearest fruit market for inspiration in planning meals that will please the family. Three quantities of crisp-checked pears meet the eye and immediately the housewife can think of several ways in which this popular fruit may be served. For breakfast, pears baked or sliced raw over the crisp morning cereal is a treat. For luncheon, fresh pears stuffed or coated with cream and Roquefort cheese mixture and served with a few simple accompaniments, contribute to a smart menu for the club group. For the dinner cocktail, diced fresh pear and balls of melon meets with universal favour, and as for desserts, there are several which will start the gourmet talking. There is the simple matter of covering stewed chilled pears halves with rich chocolate sauce or thin custard. A slight variation of this same theme is Pears in which the bland quality of the pears combines to advantage with crisp cereal—and with very little sugar. You'll like pears better than ever prepared this way:

CRUSTED PEARS

3 fresh pears
1 tablespoon lemon juice
1/2 cup honey
1 1/2 cups over-popped rice cereal
1/2 cup butter
1/4 teaspoon nutmeg

Pare fruit and cut in half lengthwise; remove core. Dip halves in mixture of lemon juice and honey. Roll in cereal which has been crushed to fine crumbs. Place in greased baking dish, cut side up. Dot with butter and sprinkle with nutmeg. Bake in moderately hot oven (400 deg. F.) about 55 minutes or until tender. Serve pears hot or cold with Custard Sauce. Yield: 8 servings.

Forest fire sometimes travels faster than deer can run. 2640

PRIZE STUDENT—C.J.N. Hansen

Flett, son of L. M. Flett, C.P.R. agent at Neudorf, Sask., has been awarded one of two scholarships provided annually by the Canadian Pacific Railway to its employees under 21 years, or minor sons and daughters of its employees, carrying up to five years' tuition at McGill, Montreal. The Neudorf student attended public schools at Fort William, Ont., Kelso and Neudorf, Man., and high schools at Neudorf, Fainborough and Neudorf, and recently completed a six-weeks' summer course at Saskatoon. He averaged better than 85 per cent. in Grade 12 exams, and is enrolled for engineering at McGill.

Military Training

Says It Should Be Placed On A Voluntary Basis

Dr. Sidney Smith, president of the University of Toronto, said representatives of five universities—McGill, Queen's, McMaster, Western and Toronto—met here Sept. 8 and decided to recommend to their governing bodies that participation in any military training program be placed on a voluntary basis. Military training has been compulsory in Canadian universities since 1941 under the Resources Mobilization Act.

This Week's Pattern

By ANNE ADAMS

Can't get to sing the praises of this lovely slenderizing frock! Pattern 4834. Princess-line panels may contrast or match; are easy to sew and fit. Leaves are embroidered. Pattern 4834: 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

MORE VITAMIN A

Several factories have been built in Ontario for the manufacture of shark liver oil which contains three times as much vitamin A as cod liver oil, and investigations are being made as to its preservation and concentration.

IS YOUR HEAD SWIMMING?

An agricultural authority remarked

the other day that there ought to be

some way of clamping price ceilings

on sales of machinery, livestock and land by auction or other private transfer. He said he'd seen prices paid for all those things that made his head swim.

From what he'd witnessed, there must be a lot of heads already swimming, so hard they fall to see where they're going. If enough of them keep on that way, the day will come when those heads can swim no longer, when they'll go under and drown in a whirlpool of inflation.

That's what happens. It's on the record. Ask anyone who remembers last war and the dizzy spiral of prices and the dizzy drop that followed.

It's that old gambling fever, of course, and there are plenty who've caught it now. Cash in their pockets, so much more than they've had in years that it just doesn't seem possible it can melt away. It can, though, like snow before breakfast in April.

When it has melted away, they'll realize that they haven't just been gambling with a fistful of extra cash.

That's when it will dawn on them—that other day that there ought to be a dawn that comes up like thunder!

That's when they'll actually be

gambling with was their country's economy, their stake in their country's future, their farm from barn to kitchen, their family's happiness for years to come.

When all that is lost, when they're left with a heartful of regrets and a headache of too-late sense, that's the time they'll say: "What I ought to have done, I guess, was salt away that extra cash in Victory Bonds. Then I'd still have had something."

BRITISH MEDICAL DISCOVERY

WILL HELP ASIA

Britain's newly discovered vaccine for scrub typhus, which during the British campaign in Burma proved an effective remedy against one of the most disabling Far East diseases, will play a vital part in Far Eastern reconstruction, report United Kingdom medical authorities. The vaccine will be used by United Kingdom and Allied rehabilitation personnel going out to the Far East to bring the long-neglected plantations back to production.

BASEBALL

Calgary All-Stars

vs.

C. N.P. - All Stars

Hillcrest Park, Sunday, Oct. 7

Game called 2 p.m.

CALGARY ALL-STARS

George Alexander, regular Catcher for Purty 59 for the season; all-around fielder who starred formerly in the backfield for Calgary Bronks football team. Played hockey with San Francisco Shamrocks of Pacific Coast League and is likely to appear with the New York Rangers this winter.

Bob Brownbridge, Catcher. Bob has starred with Air Force baseball and hockey teams in Calgary for the past three years. This year he will play hockey with the Calgary Stampede in the Western Canada Senior Hockey League. Batting average for current season is .365.

Ray Humble, Pitcher. Ray was chosen the most valuable player in the league for this season. He is a fast, consistent southpaw pitcher and when not pitching plays 1st base and right field. Batting average for the season .438.

Vern Richardson, Pitcher. Leading pitcher in the Calgary Foothills League for this season with a record of 8 wins and 2 losses. Starred in fifth game of series against Edmonton U.S. Army Yanks. Formerly the property of Montreal Royals.

Rennie Rosenthal, A speed ball pitcher who played for Detroit Bears in the Foothills League. Also a valuable man at bat with several home runs to his credit.

Carl Laing, 2nd Base. This Ontario boy has had a tryout with Toronto Maple Leafs football team and this year was one of the mainstays of the Purty 59 infield. Hits home runs regularly.

Rennie English, Shortstop and 3rd Base. Rennie is one of the boy wonders of the senior league at 18 years of age. One of the fastest men on bases with an average of one stolen base per game in league play.

Art Lewis, Right Field. This southpaw fielder bats right-handed and knocks home runs into any field.

Joe McGoldrick, 3rd Base. This veteran hockey and baseball player was playing coach for the Detroit Bears this season and batted .325.

Jerry Fath, Centre Field. Jerry played centre field and was lead-off man for the Detroit Bears. One of the leading ball hawks in the league. Batted .310 for the season.

Dick Noon, Left Field. This clutch hitter was one of the big guns of the Currie Army baseball team in winning the Provincial and Western Canada championships this year. Dick batted .375 for the season, .250 in the playoffs, and was second in home runs for the season to Earl Egan.

Archie Wilder, Shortstop. Archie started the season with No. 3 Flyers and wound up with No. 16 Repair Dept. One of the steadiest batters in the league with a .306 average; he consistently knocks home runs.

Sweeney Schriner, Calgary Coach and sensational performer. Well known to the hockey world. Will be on hand to inspire his team. Incidentally Schriner is well known to CNP hockey fans, having performed at Blairmore in junior competition.

C. N. P. ALL-STARS

J. Fleck, Catcher. CNP most efficient receiver. Bats left, hits well, and can be depended upon to direct the team in his coaching duties.

Chala, Pitcher. Well known to ball fans as a reliable performer.

Weaver, Natal boy. All-around brilliant performer. Plays 3rd or short and a leading batter of the CNP league. Bing will be doing his stuff as ever.

Paul Chala, Another Natal boy. A consistent batter and one of the best 1st base players in the league. Not flashy, but reliable, cool and deliberate.

Garcemart, 2nd Base. Affably mouthy, tough batter that can be depended upon to drive preceding batters home. "Let's see you, Moose."

Scott, Pitcher and 1st Base. Consistent receiver. Can give a good account of himself for five innings. Bats well occasionally.

C. Rhodes. The best Shortstop of the league. When on, really performs in big league fashion. He is the "spark plug" of the team. Bats well and possesses a good throwing arm.

Kauk, Pitcher. Blairmore. Fast ball artist. Holds a Calgary record for 15 strikeouts last year. A great all-around performer.

"Butch," pasture guard. Will maintain his batting average and Babe Ruth ability to point the way in home runs. We depend on Butch to match Ray Humble.

Joe Gergel, Shortstop. Natal. Brilliant performer, sharp fielding, accurate throwing arm. A good account of himself can be expected.

T. Kraft, Right Fielder. The willow winder will be on hand to see the ball hop the fence or bust. Tommy said he would not miss these games, as he is longing to get at Ray Humble. Good luck, T.

A. Bianchini, Left Field. The old reliable will again demonstrate his ability to hit in the pinches, in which capacity he will be used.

Davie Pow, Utility player. Can meet the demands of his fans any time. The diminutive performer is really smooth at 1st. We will be watching him.

Bill Fields, also a utility recruit, will be on the job as usual at either 1st, 3rd or on the mound. Fields can be depended upon for a good clout.

Manager Rosco Delini will be in there directing his players to defeat Calgary.

S. Tabor will be the Chief Arbiter. Call 'em good, Buck.

A GOOD FARMER IS A GOOD PLANNER

It's the man who looks ahead who gets ahead.

GOOD management . . . essential to successful farming, as to any business enterprise . . . is largely a matter of timely marketing and careful spending . . . waiting for the time when it is most favourable to buy.

We all want things now . . . things we have not been able to get for the past several years. Some of these things are necessities . . . some are things that will contribute to our comforts and pleasures.

Eventually, these things will be more plentiful. By waiting a little longer we will help to keep prices of things we need at lower levels and we will buy at better advantage when we do buy.

Meantime we can invest our savings in the safest securities obtainable . . . Victory Bonds. More Victory Bonds will be offered this Fall. They pay 3% interest . . . double bank interest . . . and they are "liquid capital".

If we need cash in an emergency any bank will buy Victory Bonds at any time. And any bank will loan money on Victory Bonds.

The Ninth Victory Loan will be our last opportunity to buy Victory Bonds for a whole year, so buy double this time—the same rate of savings as in previous loans will pay for twice as many bonds over the 12 month period.

FARMERS CAN BUY VICTORY BONDS ON CONVENIENT DEFERRED PAYMENTS THROUGH ANY BANK

... just sign a short form letter which Victory Loan Salesmen carry (banks have copies) ordering the bank to buy Victory Bonds for you. Pay 5% when ordering and the balance at any time during the next 12 months. The interest the bonds earn pays the interest on the bank loan.

MEADE'S BAKING SERVICE
Phone 74w BELLEVUE Alberta

A \$10,000 NEST EGG

FIL Douglas Wilson, of Calgary, who spent three years in a German prison camp, returning to Canada last June, found that his back pay plus his government gratuities had accumulated in the \$10,000 figure.

A former Blaimore boy, Douglas plans to take a course in science at the University of Alberta and to establish a home. He was married a month ago to Mary Arnall, of Regina, and they now reside at 1508 - 16th Avenue N.W.

During the early part of the war the young flier was a pilot with a Beaufort squadron, operating from Malta. In March of 1942, while flying

from the island, he ran into bad weather and crashed into the sea. He and his crew of three Englishmen were picked up by Italians and taken prisoner. The first eighteen months were spent in Sicily and Italy. Later they moved to Austria. In all, Douglas was in fourteen different camps during his three years as prisoner.

Eventually he, with six other prisoners, made their way to the American lines after walking sixty miles in two days. They were flown to Brussels, reaching England last May.—Ex.

The well known Cahoon hotel at Cardston has changed hands, sold by M. D. Cahoon to a group of business men.

ANOTHER YEAR'S WORK FOR BRITAIN'S MINESWEEPERS

At the moment there are still a hundred British minesweepers in service. They will have to carry on their hard and hazardous work for at least another year in order to clear Britain's shores of mines. The Royal Navy itself laid down 100,000 anchored mines in home waters, and the enemy,

too, managed to lay a large number. At the present time, about 300 to 350 mines are being rendered harmless in a week, but the work may be interrupted during the winter. Thus the main task in clearing the shores of Britain from the danger of mines will probably not be able to be completed until next summer.

TRY OUR SOCIETY PRINTING

To donors and others who have contributed in any way to the RED CROSS WARTIME BLOOD DONOR Service

in Alberta Division Clinics:

Dear Friends:

This letter is to say "THANK YOU!"

The volunteer Blood Donor Service of the Canadian Red Cross Society was established on January 29, 1940. Since that time, we have received over 2,300,000 blood donations in Canada. As we are now closing the service from a war standpoint, we would like to express to you our sincere appreciation for the blood donations you have so generously given.

There is always a joy in doing something for another but there is a special joy when it means the saving of a life. This Service has been the means of saving the lives of hundreds of our men in the Army, the Navy and the Air Force; so you, by your co-operation, have had a part in it. We know this thought will fully repay you.

Now regarding the future. It is most unfortunate that many deaths occur in the hospitals in Canada annually because of the lack of a proper transfusion service. The Red Cross is an organization of mercy and we are now surveying the field in Canada with a view of setting up a service to provide blood for transfusion purposes in all hospitals.

It is anticipated that it will take at least three months to complete the survey; so we again say "Thank you" for your assistance during the war period and we most earnestly request that you join with us when the new service is established in continuing to play a part in the saving of human life—something to dear to us all.

Yours sincerely,

DR. R. C. RILEY,
Chairman, Blood Donor Committee.

We had it before... LET'S NOT HAVE IT AGAIN!

• The Worst Inflation came after the last war NOW is the Real Testing time ...

Victory has been won on the battle front—but we must not relax our efforts if we are to continue to avoid the evils of inflation and deflation.

We are rapidly moving towards the day when shortages will be overcome—but reconversion takes time.

The danger of inflation, and its black shadow—deflation—will last as long as goods are not enough to meet demands.

The ending of the war brings the temptation to scramble for things we've been without, and to offer to pay any price to get them.

That's the way inflation gets started. Inflation with its soaring cost of living is bad enough.

But inflation is always followed by deflation, with its falling prices, bankrupt businesses, unemployment and distress. Deflation would be a calamity that would involve every man, woman and child in Canada.

The only controls that are being maintained are those that aid the production of needed supplies and their speedy and fair distribution to the public, and which prevent an inflationary price rise.

As soon as conditions warrant, these will be dropped.

Until industry gets back to normal production, price ceilings, rationing and some controls are a necessary safeguard for everyone of us.

Keep them working.

IT'S YOUR JOB AND YOUR SAVINGS THAT ARE AT STAKE

This advertisement is one of a series being issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.

The Pick of Tobacco

Radar

SCIENTIFIC PROGRESS was swift during the war, and there were many phenomenal developments in that field. Some of them will prove to be of value only for purposes of war, but others will have important peacetime uses. One of these is radiolocation, better known to the public as "radar." One of the most closely guarded secrets of the war, radar is generally believed to have contributed more than any other scientific factor to the Allied victory. The British Ministry of Information has recently published an interesting pamphlet on the history of this device, which it described as "the most novel and versatile weapon of the century." Originally designed for defense, radar proved also to be a powerful weapon of offense, and it is predicted that it will be "as valuable in peace as it has been revolutionary in war."

Had Many Uses In War At Sea

Radar played a large part in the success of the decisive Battle of Britain. In this connection, Air Chief Marshal Sir Arthur Tedder has stated "if radar had not prevented the Germans from obtaining the element of surprise in the raids on England, I hate to think of where we might have been." Early in the war it was used for the location of enemy planes in the skies over, and approaching England, but later radar was made available for many other purposes. In naval warfare it was used to make possible the bombing of ships at sea, regardless of fog conditions. It was also used to perfect the "blind fire" technique in naval gunnery, and it proved invaluable in the detection of enemy ships, submarines and planes at sea. Many lives were saved by the use of radar in "at-sea rescue" operation and on "D" Day it was highly important factor in the success of that great amphibious operation.

Tribute Paid To Canadians

In the closing months of the war in Europe, radar was used to overcome the effectiveness of the first flying bomb, and it was about to be successfully employed against the V-2 weapons, when Germany's collapse ended that menace. Now that it is no longer required for war, radar will still be used for many purposes. It will remove many of the hazards of air and sea travel during foggy weather, and it is believed that it may be put to use on motor highways to cut down the number of traffic accidents. Radiolocation was discovered and developed by British scientists, but credit is given to Canada's part in its success. In the manufacture of radar equipment and the training of highly specialized technicians, many thousands of whom served in Britain, Canada has made an important and valuable contribution to this great scientific development.

The Kindly Way

Abraham Lincoln Convinced Man He Was Unfit For Job

Abraham Lincoln once found it necessary to repulse the efforts of a certain entirely unworthy and incompetent applicant for the post of doorkeeper of the House of Representatives. But the President repulsed him gently and whimsically, without hurting his feelings, in this manner: "So you want to be doorkeeper of the House, eh?" "Yes, Mr. President." "Well, have you ever been a doorkeeper?" "Have you ever had any experience in doorkeeping?" "Well, no actual experience, sir." "Any theoretical experience? Any instructions in the duties and ethics of doorkeeping?" "No, sir." "Have you read any text on the subject?" "No." "Have you ever conversed with anyone who has read such a book?" "No, sir; I'm afraid not, sir." "Well, then, my friend, don't you see that you haven't a single qualification for this important post?" said Lincoln, in a reproachful tone. "Yes, I do," said the applicant, and he took leave humbly, almost gratefully.

Wonder Drug

British Doctors Cure Many Ills With Penicillin

The Manchester Guardian, England, reports another remarkable success in the use of penicillin, this time as a cure for influenza meningitis. United Kingdom doctors have already successfully used the British "Wonder Drug" to cure a large number of diseases ranging from anthrax and pneumonia to gas, gangrene and diphtheria. The germ of influenza meningitis, however, was hitherto regarded as insensitive to penicillin. Nevertheless after Manchester doctors had used it on a child suffering from this illness he responded almost immediately ultimately making a complete recovery.

Mineralized Waters

Royal Commission To Study Development Of Waters Of Lake In Saskatchewan

The medical benefits and commercial possibilities of the development of the highly mineralized waters of Little Manitou Lake, near Watrous, Sask., have been made the study for a royal commission by the Saskatchewan Government. The commission was headed by the commission: J. G. Rempel, University of Saskatchewan scientist; W. A. Riddell, provincial laboratory director; Dr. B. Brachman, Regina, and Dr. W. P. John, Vancouver. Little Manitou Lake waters have been noted for their buoyancy and for reported health-giving qualities in rheumatic and skin diseases. Mineral salts extracted from the lake's waters have been sold commercially for about a century. More than 15 years ago a company began exploitation of the great mineral bed under the lake waters but development halted because of financial troubles. —Financial Post.

The only exception to the law requiring signing one surname in official documents in England is the royal family, who sign only their baptismal names. 2640

Price Control And Rationing Information

Q—We are being asked to keep the labels and sales slips off any merchandise we buy in case we have reason to complain about high price or poor quality. How do I go about registering a complaint?

A—First you should do what you have always done—discuss any unsatisfactory merchandise with your retailer. If he feels it is in order, he will make an adjustment for you and take the matter up with his supplier. If, however, the retailer or his customer do not feel they are satisfied with the results of this discussion they can give the facts to the local office of the Wartime Prices and Trade Board for further check.

Q—I have to have special meat in my diet. Can I get more meat coupons for this purpose?

A—Yes, however you must have a doctor's or hospital's certificate which must state on it the amount of meat you will require for your special diet. This should be sent or taken to the nearest ration branch office.

Q—Our church group wants to make over some adult clothing into children's clothing to be sent to the UNRRA clothing drive. Could you tell us where we could get tips on how to make over cast-off clothes?

A—"Remake Wrinkles" is a booklet which will give you many valuable suggestions in the making over of clothing. You may obtain this guide book if you write to the Consumer Branch, Wartime Prices and Trade Board, in your province.

Q—Some friends tell me I can get dairy butter without any coupons. Is this correct?

A—No. Dairy butter is rationed the same as creamy butter. One coupon entitles you to half a pound of butter.

Please send us questions or your request for the pamphlet "Consumers News" or the Blue Book in which you keep track of your current prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Good Property To Have

Large Numbers Of People In England Are Buying Farms

Quite a few English farms are being bought just now and at very stiff prices. There is evidently a pretty general idea in Britain that land is good property to have, and so soon as a good farm puts on the market that it is very quickly purchased. Land as a producer of food has so demonstrated its vital necessity that a great many people have now a new desire to own land.

The use of liver to cure night blindness was mentioned in manuscripts written before the Christian era.

IN CANADIAN FORCES

Total Of 13,611 From United States Enlisted In Canada

A total of 13,611 men and women came from the United States to enlist with Canadian forces—more than 80 per cent. of them with the R.C.A.F. in the second Great War, a compilation by the three services showed.

The figure represents those who, on enlistment, gave the United States as their permanent residence. Many of them may have been Canadian-born, but who left homes in Canada to serve.

Of the total, 8,885 enlisted or were commissioned with the R.C.A.F., including 129 who served with the women's division. Up to the end of July, 1945, 3,789 men and five women have been discharged from the R.C.A.F. to join the U.S. forces.

The army enlisted 4,740 American residents, including 547 C.W.A.C.'s. There is no exact record of how many of them transferred to the U.S. forces at the time of Pearl Harbor or thereafter.

The nearest figure is that of 1,100, which represents the number of persons who transferred from the Canadian army to forces other than British. Most of these are believed to have gone to the American army or navy.

The money these thousands of American residents will receive from the Canadian Government in the form of discharge benefits is difficult to estimate, but it undoubtedly will be well beyond \$30,000,000.

Veterans Ministry Mackenzie said recently that of 16 benefits available to discharged servicemen who remain in Canada, those who settle in the United States would receive an allowance of \$100, a rehabilitation grant of one month's pay and allowances, transportation home, the war service gratuity—as an example, an unmarried private with two years' overseas would receive a gratuity of \$903.50—vocational and educational training, disability pension, treatment for penable disability and insurance under the Veterans' Insurance Act.

Fish Shipment

From Great Slave Lake Area For Eastern Markets

Initial shipment of fish from Great Slave Lake, authorized by Ottawa this summer has arrived at Edmonton—100 tons in five refrigerated cars from Watrous. They had been carried 400 miles in cooler barges across Great Slave Lake and down the Slave and Athabasca rivers to the end of steel, with transshipment by truck or a portage at Fort Smith.

Eastern markets will get the bulk—mainly lake trout and whitefish. McInnes Products Corp. holder of the fishing rights of the lake this year, had applied for a quota of two million pounds. The present 100-ton shipment, accordingly, represents about a tenth of the season's catch. —Financial Post.

MEET A CWAC—

"If you can bring yourself to think in terms of 35,200 eggs, 17,260 lbs. of meat, 600 lbs. of salt and 23 1/2 lbs. of pepper, etc., as a month's supply you will have some idea of just how much food we handle," said Cpl. Edith Parry of the Main Supply Depot, No. 12 District Depot, Regina, Sask., when explaining the system of supplying food to the Army. Cpl. Parry, whose home is at 147 Hetherington Ave., Winnipeg, Man., enlisted in the Canadian Women's Army Corps in October, 1943. At the completion of her basic training at Cpl. Parry, who is the only woman in the depot, was the only CWAC in the Supply Depot at that time. Cpl. Parry explained, "Since then more and more CWACs have been used for this type of work and have been found to be very satisfactory." In December, '44, she was posted to the Supply Depot at Regina and was promoted to her present rank in January, '45. In conducting a tour through the Supply Depot, Cpl. Parry drew attention to the fact that only the very best grade of food was used in feeding service personnel, and that all food was stored under the most sanitary conditions.

CWAC "REPATS"

Members of the Canadian Women's Army Corps to arrive in Saskatchewan recently from overseas and who have seen service in various theatres of war including England, the Continent and the Mediterranean were: Sgt. Peggy Johnson, Glamis; Sgt. Madeline Stiles, Porcupine Plains; Cpl. Hilda Clark, Regina; Cpl. Goldie Margolis, Canwood; Cpl. Dorothy Hook, Prince Albert; Pte. Tillie Hancheroff, LeRoy, and Pte. Marge Syme, Watrous. These army women were the first to return to Saskatchewan under the plan whereby members of the corps are repatriated after more than two years service. Sgt. Bates, Cpl. Hook and Cpl. Clark were from the first to leave the province three years ago.

THE WEARING OF CIVVIES—

Now that the war is won, restrictions on the wearing of civilian clothes have been somewhat lifted. Sergeants and above may now wear civvies after duty. For personnel below the rank of sergeants it is left to the discretion of the Commanding Officer.

BRITISHER JOINS CANADIAN WOMEN'S ARMY CORPS—

A British war bride who joined the Canadian Women's Army Corps overseas, Pte. "Reggie" Brownlee was greeted in Regina recently by her husband, Cpl. "Larry" Brownlee, Saskatoon, a veteran who returned to Canada just two weeks before his wife. Pte. Brownlee of Coulson, Surrey, England, was married in London, 1942, and enlisted in London, August 1, 1944. "I wanted to know more about the Canadians and I believed the best way was to live with Canadian girls and then come to Canada," she explained. Like others in Britain she had heard several fantastic stories about life in Canada, but "they didn't go down with her." One thing she had heard of often is the Rockies and she's looking forward to the day when she and her husband move to Vancouver. "The trip west had been one continuous thrill," Pte. Brownlee said happily. Pte. Brownlee met her husband in April, 1941. Both agreed it was "love at first sight." As a member of the C.W.A.C. she has served recently with the Royal Canadian Army Pay Corps in London. Pte. Brownlee was one of the eight members of the C.W.A.C. to arrive aboard a troop train carrying personnel from the ship "Nieuw Amsterdam".

Sergeant (to Pte. Buttercup reporting in tag minutes later): "Oh, but, put you on the 'taio report'."

Pte. Buttercup: But, please, Sergeant, I don't want to be telegraphed!

GERMANS AID ALLIES—German prisoners of war who are treating U.S. soldiers for redemption by doing work occupation forces normally would have to do, stack up used tires at a Mannheim salvage depot.

New Railway Car

Is To Be Equipped For Dancing And Movie Entertainment

Looking forward to post-war travel, Pullman-Standard has designed a new car with the definite objective of expanding the recreational opportunities of the train traveller.

Dancing and movies will be a double feature of this car, said to be the first ever designed for these types of entertainment. The forward half of the car will be ultra-modern club car during the day and a night club in the evening. The rear half will be a lounge by day and a movie theatre by night. Between the two sections there is a canteen housing a radio, phonograph, movie screen and projector. Floor space for dancing will be 20 feet in length and nine feet wide, while the theatre will seat 30 persons. It is the belief of the builder that this car will open new avenues of entertainment, while travelling.

GEMS OF THOUGHT

PRUDENCE

Prudence is a conformity to the rules of reason, truth, and decency, at all times and in all circumstances. —John Mason.

Those who, in the confidence of superior capacities or attainments, neglect the common maxims of life, should be reminded that nothing will supply the want of prudence. —Samuel Johnson.

The divine ruling gives prudence and energy; it banishes forever all envy, rivalry, evil thinking, evil speaking, and acting; and mortal mind, thus purged, obtains peace and power outside of itself. —Mary Baker Eddy.

The greatest good is prudence; a more precious thing even than philosophy: from it spring all the other virtues. —Epictetus.

Let prudence always attend your pleasure; it is the way to enjoy the sweets of them, and not be afraid of the consequences. —Jeremy Collier.

Prudence is a quality incompatible with vice, and can never be effectively enlisted in its cause. —Burke.

Sperm whales when fully grown yield up to 145 barrels of oil.

BOILS

MECCA OINTMENT

Empire tariff Preference May Be Reviewed

OTTAWA.—A well informed official in the capital recently expressed the opinion that imperial tariff preferences would be under review within a few months by conference of British commonwealth representatives.

He did not think there would be a full-sized imperial economic conference such as met in Ottawa in 1932 and which had a well-defined legal status. Instead, it likely would be a less cumbersome conference involving members of commonwealth governments and their staffs, the size depending on the number of economic questions to be studied.

Despatches from Washington have described the emphasis American negotiators are placing on a lessening of imperial preferences in any agreement between United States and the United Kingdom by which American financial assistance would be extended to enable Britain to meet her post-war difficulties.

Since the United States has free trade among its states and a tariff wall against the rest of the world, British spokesmen have frequently stressed similarly that the countries which made up the British commonwealth should not be deprived of any trading advantages they get through special tariff concessions among themselves, not extended to foreign countries, even though the empire nations spread around the earth.

Notwithstanding any rights of commonwealth countries to have tariff preferences there seems to be a feeling here that the time has come to review them and lessen them in the hope foreign nations also will reduce their tariff barriers.

Canada's attitude likely will be to inquire where the preferences it enjoys might be reduced and then to the other commonwealth countries to decide whether they are desirous of changing any of the preference which have helped them sell more products in Canada.

In 1938, the last year before the war, Canada sold the remainder of the empire's output of goods worth less than half that amount. Therefore, with a shortage of dollar exchange in all other parts of the commonwealth, Canada would be hopeful nothing be done which would tend to increase the top-heavy trade balance that existed before the war. In fact, Canadian trade officials are doing their utmost to find ways of reducing this balance by increased purchases from those countries.

FREE FROM SERVICE

R.C.A.F. Members Of Aircrew Reserve Have Been Released

OTTAWA.—Eleven thousand members of the R.C.A.F., transferred from active service to the air force's trained aircrew reserve when the war of Germany's armed aircrew requirements, are now finally released from the service, Air Minister Gibson announced.

Even though their full documentation was completed when they were transferred to the trained aircrew reserve, they were not all finally released. Mr. Gibson said, however, that now with announcement of their release from service, no action by the individual is necessary to assure his status.

The successful conclusion of the war had made it unnecessary for the air force to keep these men available. Mr. Gibson said in a statement. But their status was exactly equivalent to that of a member of the R.C.A.F. who had gone through the normal channels and been finally discharged.

All former personnel of the trained aircrew reserve, as well as all other members of the reserve, will shortly be given the opportunity to "re-engage" if they so desire, for continuing service during the transition period until September 30, 1947, the statement said.

CANADIAN FASHIONS

Retail Stores From Coast To Coast Will Display Toronto-Made Merchandise

Over 2,500 retail stores from coast to coast will show in the week of October first to sixth, Toronto-made merchandise in their windows and store displays.

The Toronto Fashion Industries feel that they are producing fashions as smart and goods as fine as any in the world. Now that restrictions are being removed, they all want to see Canadian industry go ahead. So take a good look in the stores at this show.

WILL ARRIVE SHORTLY

OTTAWA.—Two further drafts of liberated Canadian prisoners of war from the Far East are due to arrive at San Francisco Oct. 13 and 14, defence headquarters announced. The drafts will arrive on the vessels Joseph Dyckman, carrying 13 officers and 32 other ranks, and the Admiral Hughes, carrying 13 officers and 147 other ranks.

AIR FORCE MEN

More Than 30,000 R.C.A.F. Personnel Repatriated Since May 1st

OTTAWA.—More than 30,000 R.C.A.F. personnel have been repatriated from Europe since May 1 of this year and if the present rate of return is maintained it is expected that, except for those required for the occupation air force, all Canadian air force men will have been brought home by next March 31, Air Minister Gibson said in a statement.

In addition to the 30,000 already home, another 1,000 aircrew were expected to reach Canada by Oct. 1, the statement said, adding that repatriation was "proceeding at a satisfactory rate" with full advantage being taken of all shipping accommodation.

The minister said his statement was occasioned by reports that radar personnel were not being repatriated as fast as others. In answer to this he said that because 3,500 of the 4,500 R.C.A.F. radar personnel overseas were serving with R.A.F. units and not with Canadian units, the initial rate of repatriation for them was not as high as the average "but this situation has been overtaken."

The disposition of radar personnel outside Canada did not permit repatriation before V-E Day but since then 1,068 radar personnel had come home. It was anticipated that by the end of November all radar personnel from R.A.F. units will have been returned to the R.C.A.F. "at which time those low priority personnel required for the occupation force will have been selected and the balance will then be available for repatriation."

APPROVES PROGRAM

Admiral Halsey Urges Free Hand For MacArthur In Japan

HONOLULU.—Admiral William Halsey urged that Gen. MacArthur Allied supreme commander, be given a free hand to carry out the occupation of Japan.

Admiral Halsey said Gen. MacArthur is carrying out a program that will prevent Japan from ever rising above a fifth-rate power. He addressed a civic reception for 20 recovered Allied military personnel.

The admiral, whose wartime remarks about the Japanese cracked with invective, explained he had been ordered not to say anything disagreeable about his recent adversaries in the Pacific.

But his voice was tense with emotion as he described the death of released American prisoners as a "result of brutal, bestial" treatment.

The United States secretary of state, James F. Byrnes, refused to discuss the question, saying he was unprepared and that the Pacific was not on the Big Five agenda.

In view of difficulties with the Soviet Union over matters directly affecting British Mediterranean interests, Britain is reported to have decided to go along with the United States in the Pacific and abandon its request for a control commission meeting in Washington.

It was learned from officials here that the Australians, objecting to the change in British policy, delivered a note to the British cabinet stating they would insist on the right to participate in the determination of occupation policy.

According to reliable reports, Britain reconsidered and decided to request once more establishment of a control commission.

WORKERS NEEDED

Campaign For Fifty Thousand Men For Work In Lumber Camps

OTTAWA.—Labor Minister Mitchell announced a campaign to obtain 50,000 additional workers for woods operations.

"Men are needed for woods work of various kinds pretty well across Canada," Mr. Mitchell said. "The heaviest demands are in Quebec, Ontario and British Columbia, although some men are required also on the prairies and in the maritime provinces. In locating men we shall hope to secure applicants from all parts of Canada, not only from the areas in which woods operations are carried on."

WANT RAILWAY

Suggests Line From Peace River To Fort McMurray

OTTAWA.—The opening of Western Canada's Peace River district through construction of a railway to the Pacific coast was urged in the comments by Rev. William Irvine, C.C.F. member for the British Columbia riding of Cariboo.

The district needed the railway and it was time the country adopted a national railway policy.

OPEN HEALTH CENTRE

OTTAWA.—Veterans Minister Mackenzie announced that Canada's first veterans' health and occupation centre has been opened at Ottawa. The centre covers 280 acres, facing the Rideau river and adjoining Rideau park. Seven similar centres will be established later at Halifax, Saint John, N.B., Toronto, London, Ont., Winnipeg and Vancouver.

HARVEST DELAYED

Owing To Cold, Wet Weather In Many Districts

OTTAWA.—Cold, wet weather has delayed the 1945 harvest in the prairies and unless a period of good drying weather occurs within the next few days damage may be "much more extensive" than now expected, the Dominion bureau of statistics reported.

In the last of 14 telegraphic reports on crop conditions in the prairies, the bureau said reports from all sections indicate "appreciable" postponement of the harvest owing to light and heavy rains and, in some districts, snow. Frosts have occurred in the northern parts of Manitoba, Saskatchewan and Alberta but the damage reported to date has not been extensive.

Some sprouting is reported in those areas where the harvest is late. It is expected that grades will be slightly lower owing to blotching. Late crops, such as corn, potatoes and sugar beets, are being held up by rain retarded through cold weather. Market garden crops also are adversely affected.

Festures have benefited and livestock are reported to be in good condition. The feed grain crop, however, is disappointing and the delay in the harvest will further aggravate this situation through deterioration in quality.

CITIZENSHIP BILL

Is Expected To Be Presented To Parliament Soon

OTTAWA.—Provision of a Canadian citizenship under a bill expected to be presented at the current session of parliament will not deprive Canadians of their rights as British citizens, it was learned.

Under the legal change Canadians would be able to describe themselves as such, rather than as British citizens in a census and Canadian passport, and would take on a new significance.

One of the effects of the change would be to enable Canadian women who marry non-Canadians to elect whether they should remain Canadians or adopt the nationality of the husband.

DISMANTLE GERMAN PLANTS

FRANKFURT-ON-MAIN.—Gen. Eisenhower ordered that five big German industrial plants be dismantled for reparations. Among them were the Kugelfischer Geor Schafer company at Schweinfurt, largest ball bearing plant in Europe; and the Brennenwerter shipyard at Bremen, one of the largest in Germany.

EMPEROR OF RUSSIA DAMAGED BY FLAMES—Emperor of Russia, former Canadian Pacific liner, shown above which was extensively damaged by fire recently while being refitted at Barrow-in-Furness, 13 miles north of Liverpool, for service as a government transport. The fire killed at least two people, whose bodies have been recovered. In 1943 the Empress of Russia was used to repatriate war prisoners; her other wartime activities have not been made known to the public.

Equal Rights Are Wanted For Framing Peace

LONDON.—Australian Foreign Minister H. V. Evatt said that all active belligerents must have a share in the framing of the peace, which cannot rightfully be handed to the five powers represented on the council of foreign ministers.

Evatt made a vigorous bid at a press conference for Australia's rights, at least equal to those of France and Russia, in the peace conference.

He voiced Australia's demand for a "fair go" in the discussion of world peace. He said British Foreign Secretary Ernest Bevin had been "very prominent in advancing claims put forward by Australia and other active belligerent countries" claiming equal rights in the peace conference.

"Our invitation to the one session of Sept. 18 is recognition of our rights—the same rights extended to Italy," Evatt observed. "Surely we are entitled to be treated differently than defeated enemies."

He revealed that the collective invitations to the dominions did not extend beyond the single session of Sept. 18. Such procedure he said, is unsatisfactory not only to Australia but also to Canada, New Zealand and South Africa, on whose behalf similar representations are being submitted.

OTTAWA.—Mr. Mackenzie King's comment was forthrightly made on the office of Prime Minister Mackenzie King reports from London that tentative plans have been made for the opening of a meeting of an Allied control commission for Japan.

Prime Minister Mackenzie King recently told the House of Commons, however, that he planned to visit London soon if he could get away. It was expected he may leave shortly for America, where he will meet with Prime Minister Attlee, Foreign Secretary Bevin and other members of the British government.

Informed quarters have already expressed the belief that procedure being followed in the drafting of terms of peace settlements in Europe were not particularly to the liking of the Canadian government or to the governments of the other dominions.

FACILITIES POOLED

Canadian And U.S. Ships Bringing Liberated Men From Pacific

MONTREAL.—Col. R. S. Malone, head of the army public relations section, said that the hospital ship SS. Letitia now is en route to the Far East to repatriate Canadian liberated prisoners of war, and it would say that the great majority of our men will be back in Canada within a matter of weeks, perhaps in only a month.

Col. Malone, who recently returned from Japan, said that the Canadian and United States governments were pooling their hospital ship facilities in order to expedite the return of liberated prisoners of war ready to come home. Any Canadians ready to embark on the hospital ship, which was not filled would be placed aboard for return to Canada.

MAKING PROGRESS

Occupation Forces In South East Asia Are Dismaying Japan

KANDY, Ceylon.—Smooth progress in dismantling the Japanese occupation forces in the South East Asia theatre was reported, the Japanese in some cases having completed dismantling in advance of the date ordered.

Besides dismantling the Japanese, the main job of British and Indian occupation forces in South East Asia command is recovery of Allied prisoners of war and internees. On completion of these tasks they will withdraw from countries such as Java, Sumatra, Siam and Indo-China which were not under the British flag before the war.

The same principle will guide withdrawal of Australian forces from Borneo, Celebes and Dutch Timor.

SHIPS FROM ORIENT

Have Been Recruited To Avoid Panama Canal Tolls

LONDON.—The ministry of war transport announced that ships from New Zealand and Australia had been recruited to avoid the Panama canal, where tolls must be paid in dollars. The ministry said ships from New Zealand would be sent going around Cape Horn, although some would travel through the Suez canal. Australian coal burners will be sent around the Cape of Good Hope and oil burners will go through Suez.

HELPED TWO LIVE—Capt. I.

Roy Gold of U.S. army medical corps, who was in charge of the blood transfusions given to the former Japanese premier, Hideki Tojo, is the son of Mrs. M. Gold of Montreal. Capt. Gold was born at Glace Bay, N.S., and educated in the public and high schools there before moving to Montreal. In 1942, he joined the U.S. army medical corps as a lieutenant.

Railways In Europe Are A Great Problem

LONDON.—Damage to European railway systems through war, German looting and occupation is one of the continent's worst economic ills and strenuous efforts are being made to get them in full operation again.

Food and coal distribution, vital to prevention of famine and epidemics this coming winter, largely depends on the rapid solution of the railway problem and in many respects the railways are the only sound basis on which Europe's economy can be rebuilt.

Allied military commands have assisted railway reconstruction in many areas, first for operational needs when the campaigns were on, and now to help the various nations back on their feet.

However, the railway problem is gradually becoming a civilian concern and a provisional organization for European inland transport, formed by agreement among governments of France, Belgium, Luxembourg, Holland, Norway, the United States and Britain, is advising various European governments and authorities on getting railway traffic moving again.

Repair of worn-out and war-damaged transport has received special attention from this organization and British rail experts have been sent to France, Belgium and Holland with four mobile demonstration workshops to teach new methods of electric and oxy-acetylene welding.

France has made the best recovery in Europe in restoring her railway system and now all important links between Paris and the rest of the country are operating.

The boat train from Paris to London is running. The journey, however, takes 16 hours, compared with eight hours before the war and civilian travellers must still obtain travel permits from French or British government departments to use this route.

The greatest damage to French railways was done by Allied bombing and it is estimated at nearly \$300,000,000. Damage done by French resistance sabotage totalled about \$15,000,000 and there was about \$10,000,000 damage caused by campaigns on French soil.

ARAB LEAGUE

Will Not Accept Plan For Jewish Immigration

CAIRO.—Abdul Rahman Azzam Bey, secretary general of the Arab League, said at a meeting here that the Arab league could not accept the plan, reported to have been supported by President Harry Truman in a letter to the British government, for the immigration of 100,000 Jews into Palestine.

"We cannot accept such a plan," Azzam Bey said, "we shall not cooperate in any way."

Azzam Bey declared that Palestine was an "Arab unit." "The Arabs want permanent peace. As the world cannot survive a third world war we want to reach our aims by co-operation," he said.

Arab circles are relieved that Britain, according to latest reports, has declined to assume entire responsibility for the Palestine question and intends to refer it to the council of the United Nations—a report carried in a Reuters despatch from London.

GOOD CONDUCT BADGE

OTTAWA.—The navy announced that the good conduct badge, representing the highest standard of conduct in the service, now may be worn by ratings of the Women's Royal Canadian Naval Service. Wrens will not receive the extra pay allowance granted men for the badge. It is worn after three years of good conduct.

WILL HAVE THEIR PART

CHUNGKING.—China will send occupation forces to Japan, a government spokesman here said, announced in response to a new conference question. Size of the force, he added, remains to be worked out on the basis of "future necessities" as decided upon by co-operating nations.

Local and General Items

John Rosso, aged 64, was fatally injured in a mine north of Edmonton on Monday.

Miss Dorothy Wislet is down from Calgary on a week's visit to her parents here.

Close to 200,000,000 workers are idle because of strikes and shutdowns throughout the United States.

Solon Low is going more into the bull business, having just purchased a young Jersey to be added to his fleet at Cardston.

At a family reunion of descendants of Thomas R. Leavitt, held at Cardston recently, no less than 430 attended.

Rocco Curcio, who had been on several weeks furlough at his home here, left during the week to resume duties with the Royal Canadian Navy.

Starting out on a holiday, Dr. Blayney, of High River, had his suitcase stolen from his car in Calgary. Its contents were valued at \$100.

Albertans will be able to buy Victory Bonds over a twelve-month period, instead of the usual six months, when the Ninth Victory Loan campaign opens late this month.

Norman Beck, but recently returned from overseas, had his leg badly crushed while at work in the Bellevue mine last week end, and is expected to be laid off for some time.

CONTRIBUTION OF RETURNED MEN

In a recent speech at Ottawa, Mr. Arthur MacNamara, director of national selective service, discussed veterans' employment. In closing he said: "It will be our problem to absorb the straight-thinking and broad-minded approach to life which they can give us."

If there is one thing more than another that grieves a homecoming veteran, it is to see factions in the country scrapping with each other for power or money. Was it for this that some of his best friends died? He hates to see labor and management at each other's throat. He wants to see the spirit of teamwork learned in battle applied in industry.

This spirit is demonstrated in a plant where a worker's council was set up with the objective of creating teamwork which could be a pattern for all industry. Experience of the last two years has proved that teamwork produces higher wage earnings and maintained profits, that confidence promotes production. Output has remained at 100% of normal, as against a wartime reduction in manpower of one-third. The figures are actually better than this because overtime has been greatly reduced with a marked improvement in the health of the workers.

The attitude of the company executives is that it is only possible to see the true place of labor and management in a plant in light of the true destiny of industry—"to demonstrate a Christian democratic way of life that works." They feel that the trade union is so essential a part of industrial teamwork that "if it did not exist it would be necessary to invent it. It is the co-ordinating factor that enables labor to make its maximum contribution to the general well-being."

The reaction of the men is indicated by one worker who remarked: "The biggest thing in the annals of this company is the worker's council and what it stands for. It is worth fighting for with all we've got."

The trade union secretary added, "What is being done here is important not only for your firm, but for the whole of industry."

This is an encouraging demonstration for our returned veterans of the "straight-thinking and broad-minded approach to life," of which Mr. MacNamara spoke.

To promote good will, demote self-will.

BC butcher strikers quit their strike on Tuesday and returned to work.

It is better in the end to tell the truth in the beginning.

Next Monday will be observed as Thanksgiving Day.

The average daily yield of oil at Turner Valley is now 18,806 barrels.

Unless in our homes democracy is reborn every day, it will vanish from the face of the earth.

When we do more heart to heart talking with the other fellow, we'll do less behind his back.

H. T. Halliwell, publisher of the Macleod Gazette, has been confined to his bed through illness.

Four Canadians were among the 41 dead in a British train wreck on Sunday last. More than 100 were injured.

Previously reported missing, Raymond Gale Leonard, son of Charles Leonard, of Crows' Nest, is now for official purposes presumed dead.

For Sale — A ticket, entitling one adult to attend all doings at the Riverside rink at Frank for the season 1902-03. Appy The Enterprise.

Flight Sergeant W. K. Naylor, of Coleman, was one of the fourteen Albertans to receive special awards for services overseas.

According to statement issued, the Crows' Nest Pass coal mines lead in Alberta production with 172,191 tons for the month of August.

Andy Davison has resigned from the mayorship of Calgary. During his 22 years' service as councillor and mayor he has no doubt done good work.

Frank Freeze, for about eighteen years alderman of Calgary, will be a candidate for mayorship in the election to take place shortly to fill the vacancy caused by the resignation of Andy Davison.

The colonel did not believe in forgetting those he left behind. To his son in college he wrote: "I am now standing on the cliff from which the Spartans used to throw their defective children. Wish you were here."

Rev. A. A. Nelson, of Regina, was victim of mistaken identity last week end when his car was stopped at the point of police guns, suspected as being a store robber. It was some little time afterwards that his identity was established and he was freed. He is now in Calgary.

In a list of decorations and awards to Canadian soldiers broadcast over the radio last week was Capt. Jack Church, son of Mr. and Mrs. Cliff Church, of Macleod and formerly of Blainmore. He is with the Canadian Army in Occupation in Northwest Europe.

A former Coleman youth, Lt. William Asbridge, 21, is listed as missing following a raid over Honabee Islands, Japan, on July 18th. He came from England with his parents at the age of two, and received his early education there, later moving to Mercoal and still later to Edmonton. He was in command of an all-Canadian section aboard the British aircraft carrier Formidable.

Citizens of Halifax, it is reported, are giving a royal welcome to the returning troops. Whenever a transport docks, they assemble in crowds, cheering and bearing gifts. It's a charming custom and one that should help to advertise the virtues of Halifax to the rest of Canada.

But, in the opinion of Sergeant John Doe, it can be overdone. The sergeant had spent four years overseas, going through the blitz and D-Day without a scratch. He was feeling full of joy

THANKSGIVING SERVICE

A Thanksgiving service will be held at Central United church on Sunday evening next at 7:30 o'clock. During the service special vocal and instrumental musical numbers will be rendered.

At the close of the service a congregational social hour is being planned, in the assembly hall, to which all servicemen of the congregation are cordially invited.

The Pincher Creek B.E.S.L. have purchased the T. Label block.

FREESTONE PEACHES. — Large \$2.00 and \$1.75, medium \$1.50, small \$1.25. Cash. Express extra. — C. KELSEY, Erickson, B. C.

First Alberta unit to return from overseas, officers and men of the 33rd Canadian Field Company, Royal Canadian Engineers, have reached their homes after returning to Canada on the Nieuw Amsterdam. Lt. Corp. J. G. Conner, of Bellevue, returned with them.

Extra allotments of sugar have been given to all coal and ore miners in the United States. Further recognition of sugar as an energy food came from San Francisco and Denver areas, where the first experiment was recently conducted.

PASS MINERS TO STAY OUT

* At a well attended meeting of the U. M. W. of A. held here on Tuesday a unanimous decision was reached to remain idle in protest against the present meat ration set-up. Representatives were present from all points between Fernie and Bellevue.

The miners will remain idle pending reconsideration of the board's decision. Meanwhile butcher shops in this district were reopened on Tuesday.

Too many people talk of the "left wing" and the "right wing" of political thinking. They think too little of the bird in the middle, without which wing are useless. That bird is the public.

I. H. Stack, K.C., of Calgary, and E. B. Feir, of Stettler, have been named Alberta district court judges. Judge Feir succeeds Judge Jackson in Lethbridge, who retired July 1st, and Judge Stack succeeds Judge A. M. MacDonald, of Calgary and formerly of Macleod.

So Mr. Hsley is to have a Parliamentary Assistant. He has carried a tremendous burden throughout the war, and now is entitled to some rest so he can think up as many ways of reducing taxes as he did to increase them during the war. — Lethbridge Herald.

Labor organisation membership in Canada has doubled since the beginning of the war, the total now being given at 724,188. In 1938 the figure was 381,645.

A defence technique has been devised against atomic bombs that is so simple that the bombs can be detonated without even knowing their exact whereabouts. Its very simplicity might prove a menace, it is stated. An amateur experimenter might unwittingly explode a store of atomic bombs as far away as four miles with catastrophic results.

A local youth who had reached the state at which his voice was changing went into a grocery. In a deep voice he demanded a sack of flour, then his voice changing suddenly to a high pitch he added "and a pound of butter." "Just a minute, please," said the clerk. "I can't wait on both of you at once."

Warm clothes for Christmas. The knowledge that the clothes which Canadians will be donating in the National Clothing Collection campaign from Oct. 1 to Oct. 20, will be delivered in Europe before Christmas, will send a glow of happiness through the thousand of distressed people in the lib-state at which his voice was changing. Efficient clothing to keep their emaciated bodies warm enough to ward off disease.

The Ladies' Aid will hold their ANNUAL FALL TEA and Sale of Home Cooking in the United Church Auditorium on SATURDAY, NOV. 3, 3 till 6 p.m. Everybody welcome.

Mr. and Mrs. E. V. Steele, at one time residents of Blainmore, will be guest speakers at the Salvation Army on Sunday, October 7th, at 7:30 p.m., in Coleman. While reading at Blainmore, Mr. Steele was agent for the Metropolitan Insurance Company. Leaving Blainmore, he and his wife went to the Three Hills Bible College, after which they gave themselves for missionary service. While enroute to Africa on the Zam Zam they were torpedoed by a German submarine. Mrs. Steele was later released through an exchange of prisoners, while Mr. Steele only recently returned. They will be worth hearing, and a hearty invitation is extended to all.

THE CHALLENGE OF AN EMPTY PLATE*

* BEEF — 140,000,000 lbs. still to be shipped.

The United Kingdom and Liberated Europe rely on for Canada 215,000,000 lbs. this year.

We supplied only 85,000,000 lbs. to August 31.

* PORK — 100,000,000 lbs. still to be shipped.

The United Kingdom and Liberated Europe rely on Canada for 450,000,000 lbs. this year.

We supplied only 350,000,000 lbs. to August 31.

* CANNED MEAT — 70,000,000 lbs. still to be shipped.

The United Kingdom and Liberated Europe rely on Canada for 114,000,000 lbs. this year.

We supplied only 44,000,000 lbs. to August 31.

In most liberated European countries, there is a desperate shortage of meat.

As a great food-producing nation, Canada must, can — and will — help to meet the emergency.

The job will not be finished at the year's end. Food scarcities in Europe will continue until the next harvest.

This year, Europe is relying on Canada for a minimum of 789 million pounds of beef, pork and canned meat.

Up to the end of August, only 479 million pounds had been sent.

How soon can we bridge the gap?

Livestock marketings are normally at their heaviest in the last four months of the year.

If we are to help feed the hungry peoples of devastated Europe, this is the time to make our greatest effort.

To do our part, we must reduce our own consumption of meat and also assure that everyone in Canada gets a fair share.

That is why rationing is necessary.

MEAT RATIONING ADDS TO EVERYONE'S WORK

The producer who slaughters, the retailer who sells, the consumer who buys and eats — they all play a vital part.

AS A CONSUMER, HERE IS HOW YOU CAN CO-OPERATE

1. Try to plan your meat purchases before leaving home by determining what cuts you intend to buy and their approximate weights.
2. Make sure you have enough valid coupons and tokens to cover your proposed purchases by referring to the Consumer Coupon Value Chart and the Coupon and Token Calculator. Copies may be obtained from your Local Ration Board or Ration Branch.
3. Know the dates your "M" coupons become valid.
4. Do not buy more meat than you really need.
5. Avoid shopping at rush hours.
6. Be patient. Remember — your butcher may have inexperienced help.

HELP YOUR BUTCHER TO SERVE YOU WELL

THE WARTIME PRICES AND TRADE BOARD
